YOUR COMPLETE WEBSITE AUDIT

Hi jordan,

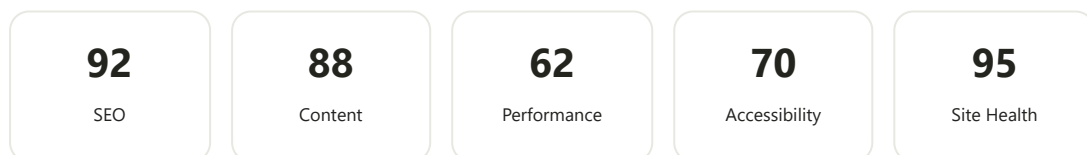

We've inspected <https://jpipercleaning.com/>. This email contains the complete automated report — including every check run, every finding and the available fix guidance.

84_{/100}

OVERALL WEBSITE HEALTH

18 pages inspected · 59 checks run · 8 issues found

Website health breakdown

Carbon efficiency: F · F · 10.99 MB page transfer

Efficiency estimate only; not measured CO₂ and not included in the overall score.

Complete audit — all 59 checks

51 passed · 8 need attention. Fix guidance is included beneath findings where action is useful.

SEO 27 checks · 23 passed · 4 findings

IMPROVEMENT

Phone in schema

No telephone/contact point was found in the detected business schema.

How to fix: Add the primary business telephone/contact information to the relevant structured data when the business publishes a phone number.

IMPROVEMENT

Address in schema

No address or service-area information was found in the detected business schema.

How to fix: If customers visit a physical business location, add the genuine postal address to the relevant schema. For a service-area business that intentionally hides its street address, do not publish a private address merely to satisfy this check; use accurate service-area information instead.

IMPROVEMENT

Service area in schema

No areaServed/service-area data was found in the detected business schema.

How to fix: For businesses that serve defined locations, add accurate areaServed information and make the service area clear in visible website content. Avoid listing locations the business does not genuinely serve.

IMPROVEMENT

Profile links in schema

No sameAs profile links were found in the detected business schema.

How to fix: Add sameAs links for genuine official profiles such as established social profiles or other authoritative business identities. Do not add unrelated directory links simply to increase the count.

PASSED

Page title

Your homepage title is 51 characters long.

PASSED

Titles across crawled pages

18/18 crawled pages have page titles.

PASSED

H1s across crawled pages

18/18 crawled pages have exactly one H1.

PASSED**Business structured data**

Specific local business structured data was detected.

PASSED**Meta description**

Your homepage meta description is 174 characters long.

PASSED**Descriptions across crawled pages**

18/18 crawled pages have meta descriptions.

PASSED**Unique page titles**

No duplicate page titles were detected in the crawled sample.

PASSED**Internal linking**

The homepage contains 98 internal links.

PASSED**Local schema specificity**

A LocalBusiness or specialist local business schema type is present.

PASSED**Visible contact signals**

Visible contact signals were detected on the homepage.

PASSED**Thin content across pages**

0 of 18 crawled page(s) contain fewer than 200 detected words; 0 contain fewer than 100.

PASSED**Main heading coverage**

18 of 18 crawled pages have at least one H1.

Diagnostic check — not scored separately.

PASSED

Local business readiness

This combines business schema, visible contact information and genuine location/service-area signals.

Diagnostic check — not scored separately.

PASSED

Business name in schema

The business name is present in structured data.

PASSED

Location/service-area signals

Location or service-area signals were detected in the homepage content.

PASSED

Multiple H1 headings across pages

No crawled pages use multiple H1 headings.

PASSED

Page title quality

0 of 18 crawled page(s) have unusually short or long titles.

Diagnostic check — not scored separately.

PASSED

Meta description coverage

18 of 18 crawled pages have meta descriptions.

Diagnostic check — not scored separately.

PASSED

Unique meta descriptions

No duplicate meta descriptions were detected in the crawled sample.

PASSED

Homepage content depth

Approximately 4168 visible words were detected on the homepage.

PASSED**Twitter/X card metadata**

Twitter/X card metadata was detected.

PASSED**Opening hours in schema**

Opening-hours data is present in structured data.

PASSED**Public location/service-area signal**

A public address, location or service-area signal was detected.

Content 7 checks · 7 passed · 0 findings**PASSED****Main H1 heading**

Your homepage has one main H1 heading.

PASSED**Supporting headings**

Your homepage has 31 H2 headings.

PASSED**Internal anchor text**

No excessive generic internal anchor text was detected.

PASSED**Social sharing metadata**

Open Graph title, description and image are present.

PASSED**Descriptive links across pages**

No excessive generic internal link labels were detected across the crawl.

Diagnostic check — not scored separately.

PASSED**Social sharing metadata across pages**

0 of 18 crawled page(s) are missing complete Open Graph metadata.

Diagnostic check — not scored separately.

PASSED**Twitter/X metadata across pages**

0 of 18 crawled page(s) have no Twitter/X metadata.

Diagnostic check — not scored separately.

Performance 2 checks · 0 passed · 2 findings**PRIORITY****Largest Contentful Paint**

Largest Contentful Paint was 20.13 seconds on Google's mobile Lighthouse test.

How to fix: Identify the Largest Contentful Paint element, commonly a hero image, banner or large text block. Optimise and correctly size that asset, preload critical resources where appropriate, improve server response time and remove render-blocking work. Aim for 2.5 seconds or less.

IMPROVEMENT**Mobile performance**

Google Lighthouse mobile performance score: 59/100.

How to fix: Treat this as a Lighthouse test snapshot. Start with the slowest loading resources and largest above-the-fold elements, reduce unnecessary JavaScript/CSS, optimise images and caching, then retest several times.

Accessibility 1 checks · 0 passed · 1 findings**IMPROVEMENT****Image alt attributes**

270 of 593 image(s) across the crawled pages are missing an alt attribute entirely. 0 use empty alt text.

How to fix: Add concise, descriptive alt text to informative images. Decorative images can use an empty alt attribute (alt=""). Start with prominent service, product and content images rather than stuffing keywords into every image.

Site Health 22 checks · 21 passed · 1 findings

IMPROVEMENT

Robots.txt

We couldn't find a usable robots.txt file at /robots.txt.

How to fix: Create a valid /robots.txt file. Do not accidentally block important pages or assets, and include your sitemap URL where useful. If a robots.txt exists, verify it returns plain text rather than an HTML error page.

PASSED

Homepage indexability

No homepage noindex directive was detected.

PASSED

HTTPS security

Your website is using HTTPS.

PASSED

Homepage response

Your homepage returned HTTP 200.

PASSED

Indexability across pages

No noindex directives were detected in the crawled sample.

PASSED

Canonical URL

Your homepage has a canonical URL.

PASSED

Mobile viewport

Your website includes a mobile viewport configuration.

PASSED

XML sitemap

A sitemap index was found at https://jpipecleaning.com/sitemap_index.xml.

PASSED

Broken internal links

No broken links were found in 20 sampled internal links.

PASSED

Cumulative Layout Shift

Cumulative Layout Shift was 0.000 on Google's mobile Lighthouse test.

PASSED

Canonicals across pages

18/18 crawled pages have canonical URLs.

PASSED

Insecure HTTP references

No obvious insecure HTTP resource references were detected.

PASSED

Structured data

Structured data detected: LocalBusiness, Organization, ImageObject, WebSite, SearchAction, WebPage.

PASSED

Mobile viewport across pages

All crawled pages include a mobile viewport declaration.

PASSED

Indexable-page coverage

18 of 18 crawled pages have no detected noindex directive.

Dagnostic check — not scored separately.

PASSED**Internal link health**

0 of 20 sampled internal links returned an error.

Diagnostic check — not scored separately.

PASSED**Total Blocking Time**

Total Blocking Time was 18 ms on Google's mobile Lighthouse test.

PASSED**Secure internal URLs**

No insecure internal HTTP links were detected.

PASSED**Canonical coverage**

18 of 18 crawled pages have canonical URLs.

Diagnostic check — not scored separately.

PASSED**Multi-page crawl**

Successfully analysed 18 page(s) from the website.

PASSED**URL structure**

The crawled URLs have reasonable lengths.

PASSED**Clean crawl URLs**

No crawled page URLs contain query parameters.
